Mumbai, India | 9326679882 | shahaarav2806@gmail.com | [Linkedin](#) | [GitHub](#) | [Portfolio](#)

Education

SVKM's Shri Bhagubhai Mafatlal Polytechnic
Diploma in Computer Science Engineering

Aug 2024 – Present
Mumbai, India

Rustomjee International School
School SSC — Percentage: 88.62

May 2024
Mumbai, India

Projects

F1 Race Replay: Interactive Formula 1 Telemetry Visualizer
Python, FastF1, Arcade, NumPy

July 2026
Developer

- Developed an interactive desktop application for replaying Formula 1 race sessions using real-world telemetry data from the FastF1 API.
- Built a graphical race visualization system displaying live driver positions, track layouts, lap timing, tyre compounds, driver status, and leaderboard updates.
- Implemented interactive playback controls including pause, rewind, fast-forward, variable playback speeds, driver selection, and configurable HUD elements.
- Simulated and animated Safety Car deployments using track-status telemetry, including deploying, on-track, and returning phases with visual effects.
- Added telemetry insights for selected drivers, displaying speed, gear, DRS status, throttle, brake inputs, and lap information, with support for race and qualifying sessions.

Greenova: Environment Conscious Software Ecosystem
Python, JavaScript, React

April 2026
Co-Lead Developer

- Collaborated with a team of 4 developers to create an Environment Conscious Ecosystem.
- Independently developed the entire website end-to-end, from front-end interface to backend integration.
- Assisted a teammate with backend development for both the mobile app and the website, including AI inference pipelines and data collection systems for environmental impact analysis and model fine-tuning.
- Helped build the backend logic for the mobile app used to calculate an individual's Carbon Footprint based on user purchases and everyday actions relative to the environment.

DreamCatcher: Multilingual AI Career Guidance Platform
Python, Flutter, Dart, FastAPI, PostgreSQL, Google Cloud, Vertex AI

September 2026
Co-Lead Developer

- Built an AI platform helping rural students discover scholarships, courses, exams, internships, and career pathways.
- Implemented browser-based voice counselling with Google Cloud Speech-to-Text and Text-to-Speech.

Skills

- Languages:** Python, JavaScript, SQL, HTML/CSS, C, Java, LaTeX
- Frameworks & Libraries:** React, Vite, FastAPI, Node Js
- Databases:** PostgreSQL, SQLite, MongoDB, Redis
- Tools & Platforms:** Git, GitHub, Docker, VS Code, Visual Studio, AWS
- AI/ML:** Google Gemini API expertise, Prompt engineering skills
- Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Tensorflow, PyTorch, LangGraph, LangChain, Flask, Pygame, Pydantic
- Soft Skills:** Team collaboration, Problem-solving, Critical thinking, Time management

Achievements

- Hackathon Winner — Thakur College of Engineering & Technology:** Won 1st place with Greenova, an AI-powered sustainability scoring platform for businesses and products.
- Top 5 — Ignite IT 8.0 (SBMP College of Engineering):** Reached the top 5 with DreamCatcher, a multilingual AI career guidance platform for rural students.
- Hackathon Finalist — Ignite IT 7.0 (SBMP College of Engineering):** Reached the finals with an AI-driven news platform that predicted likely local events and developments based on surrounding trends.
- 4th Place — Mukesh Patel College of Engineering Hackathon (ACM):** Built Zealflow, an offline-capable alternative to Google Forms with support for CLI-based devices.
- Certificate of Excellence — CODE PRISM @ Spectrum 4.0 (SBMP College of Engineering):** Recognized for strong performance in a competitive coding question-and-answer competition.
